

Rakesh Choudhary

Full Stack Engineer (React.js / Next.js / Node.js)

+91 9024226200 | rakeshchoudhary941397@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full Stack Engineer with 2+ years of experience building scalable, production-grade web applications using **React.js, Next.js, Node.js, and TypeScript**. Deeply passionate about crafting fast, seamless user experiences and shipping end-to-end features across diverse domains including EdTech, travel, and e-commerce — driven by a genuine love for clean code and real-world impact.

Strong foundation in backend system design and database architecture using **MongoDB and MySQL**, with hands-on experience integrating third-party APIs, implementing authentication flows, and optimizing data pipelines for high-throughput applications. Skilled in **AI-augmented development workflows** — using tools like GitHub Copilot, OpenAI Codex, and Google Antigravity to accelerate coding, code review, and debugging cycles — to ship features faster without compromising code quality. Adept at working in cross-functional teams and aligning technical decisions with business outcomes.

Genuinely enjoys the problem-solving side of engineering — breaking down complex product requirements into clean, maintainable code, and staying curious about new tools and frameworks that make development faster and more enjoyable. Comfortable owning a feature from initial design conversations through to deployment and post-launch iteration.

TECHNICAL SKILLS

Programming: TypeScript, JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, Next.js (SSR/SSG), Tailwind CSS, Bootstrap

Backend: Node.js, REST APIs, Express.js

Databases: MongoDB, MySQL

Cloud & Tools: Git, Azure (Fundamentals), Vercel, Web Performance Optimization, SEO

AI-Assisted Development: GitHub Copilot, OpenAI Codex, Google Antigravity, Prompt Engineering, AI-Powered Code Review & Debugging

PROFESSIONAL EXPERIENCE

Full Stack Engineer

Dec 2025 – Present

Keasbrain Technologies Pvt Ltd | Jaipur

- Leading end-to-end development of **Visuti Career**, a multi-panel SaaS career-counselling platform, using **React.js, Next.js, Node.js, and TypeScript**, taking it from build to hundreds of live student users within the first month of launch.
- Architected and implemented **RESTful APIs** supporting complex counselling workflows (seat matrices, closing ranks, allotment data), with a strong focus on speed and reliability through query optimization and indexing strategies.
- Designed and optimized **MongoDB and MySQL** schemas for high-volume counselling datasets, driven by a passion for clean data architecture and fast retrieval through aggregation pipeline refactoring.
- Improved frontend rendering performance and UI responsiveness, bringing meaningfully faster, smoother experiences to students using the platform.
- Integrated **GitHub Copilot** and **AI coding assistants (Codex, Antigravity)** into the daily development workflow, speeding up boilerplate generation, unit test scaffolding, and code review turnaround.
- Worked closely with product and design to translate counselling workflows into intuitive interfaces, iterating quickly on feedback from client.
- Took ownership of deployment and release cycles for the platform, ensuring smooth updates and minimal disruption to live users.

- Developed and maintained multiple high-performance web applications using **React.js** and **Next.js**, driven by a genuine focus on making pages load noticeably faster through code splitting, lazy loading, and asset optimization.
- Built and standardized a library of reusable UI components in React, out of a passion for clean, consistent design systems that made feature development faster for the whole team.
- Collaborated cross-functionally with backend and design teams to deliver production-ready features on schedule across multiple client projects.
- Implemented SSR and SSG patterns with Next.js, meaningfully strengthening SEO performance for content-heavy pages.
- Recognized as Employee of the Week multiple times for consistently delivering high-quality work and mentoring junior developers on React best practices.

PROJECTS

Visuti Career — Career Counselling Platform *(built at Keasbrain Technologies)*

- Built a scalable **role-based access control (RBAC)** system managing 5+ user roles (admin, counselor, student, staff) with granular module-level permissions across **Admin** and **Student** portals.
- Implemented a plan-gated data access system allowing students to unlock premium college insights (seat matrix, allotment history), directly tied to a subscription revenue model.
- Delivered end-to-end **authentication flows** (JWT-based login, session management, OTP verification) with zero reported security incidents post-launch.
- Built advanced multi-criteria filtering (state, course, rank range), driven by a focus on making complex counselling data genuinely easy and fast for students to explore.

Stop Delay — Flight Compensation Platform

- Built an intuitive, responsive UI using **React.js** for the flight compensation claim experience.
- Integrated third-party APIs for flight data on the frontend and worked with secure authentication flows to protect user data.
- Designed a multi-step claim submission form with client-side validation, focused on making a stressful process (delayed flights) feel simple and reassuring for users.
- Designed an animated homepage hero featuring flying cloud and aircraft visuals, adding a polished, engaging first impression that set the tone for the rest of the platform.

JKJ Jewellers — E-commerce Platform

- Built product listing, cart, and checkout flows for an online jewelry store, with a strong focus on a smooth, trustworthy payment experience for customers.
- Implemented responsive UI and SEO best practices (structured data, meta optimization), driven by genuine care for how customers discover and shop on mobile.
- Designed product detail pages with rich imagery and zoom interactions, aiming to make browsing fine jewelry online feel as close to an in-store experience as possible.
- Built a clean, filterable product catalog (category, metal, price range), out of a passion for making it effortless for customers to find exactly what they're looking for.

EDUCATION

Bachelor of Computer Applications (BCA)	2021 – 2024
S.S. Jain Subodh P.G. (Autonomous) College	Jaipur, Rajasthan
Intermediate (Class 12)	2021 90%
Govt. Sr. Sec. School, RBSE	Jaipur, Rajasthan
